AFRICA MEDICAL EQUIPMENT FACILITY

FINANCIAL MANAGEMENT COMPONENT

INTRODUCTION TO THE FINANCIAL ADVISORY TOOLKIT

Creating Markets, Creating Opportunities

Introduction – Africa Medical Equipment Facility (AMEF)

Creating Markets, Creating Opportunities

IFC designed **a multi-component advisory program** to address the challenges of procuring medical equipment as a joint initiative between the Financial Institutions Group Advisory, Healthcare Quality Advisory, and the Financial Management Advisory programs.

The multi-component advisory program will help strengthen Financial Institutions' (FIs) understanding of lending to the healthcare sector and enhance Healthcare SMEs' (HSMEs) capacity in financial management and medical equipment planning. The advisory program has three components:

Component 1: Onboarding, Training, and Implementation Support for Partner FIs

advisory program will An be delivered to banks through (i) a training program to help banks **Risk-Sharing** understand the criteria Facility eligibility HSMEs and reporting for requirements, and (ii) workshops to develop recommendations on how the Risk-Sharing Facility can be utilized most effectively and assist with building an implementation plan.

Component 2: Training & Awareness Building on Medical Equipment Planning, Procurement, Maintenance, and Other Relevant Issues for HSMEs

An advisory program will provide HSMEs with access to necessary information and training materials to facilitate smart decisions on equipment purchasing and operations.

An advisory program will be delivered to HSMEs to strengthen their financial management capacities, particularly around cashflow forecasting, budgeting, and business planning.

The intended outcomes of the Financial Management component are two-fold: 1) Building the capacities of HSMEs and improving their access to finance; and 2) Facilitating the relationship between banks, such as Co-op Bank, and HSMEs.

Build the capacities of HSMEs and improve their access to finance

- Build the capacities of HSMEs around business planning, cashflow forecasting, and financial controls and policies through the Financial Advisory Toolkit.
- Enhance HSMEs' financial readiness to correspond to the lending requirements of banks, such as Co-op Bank, hence improving their access to finance.`

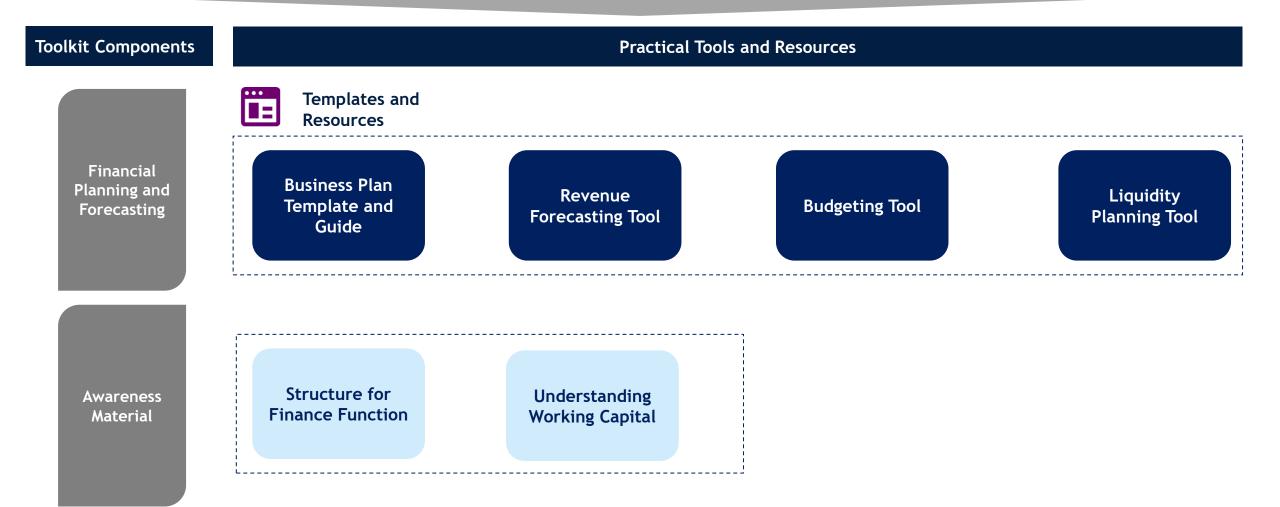

Facilitate the relationship between banks and HSMEs

- Enable banks to support HSMEs with technical advice, hence improving their access to finance.
- Train the non-financial services (NFS) arm of banks, such as Co-operative Bank, to enable them to rollout the Financial Advisory Toolkit that will be used to support other HSMEs in the future.

Banks

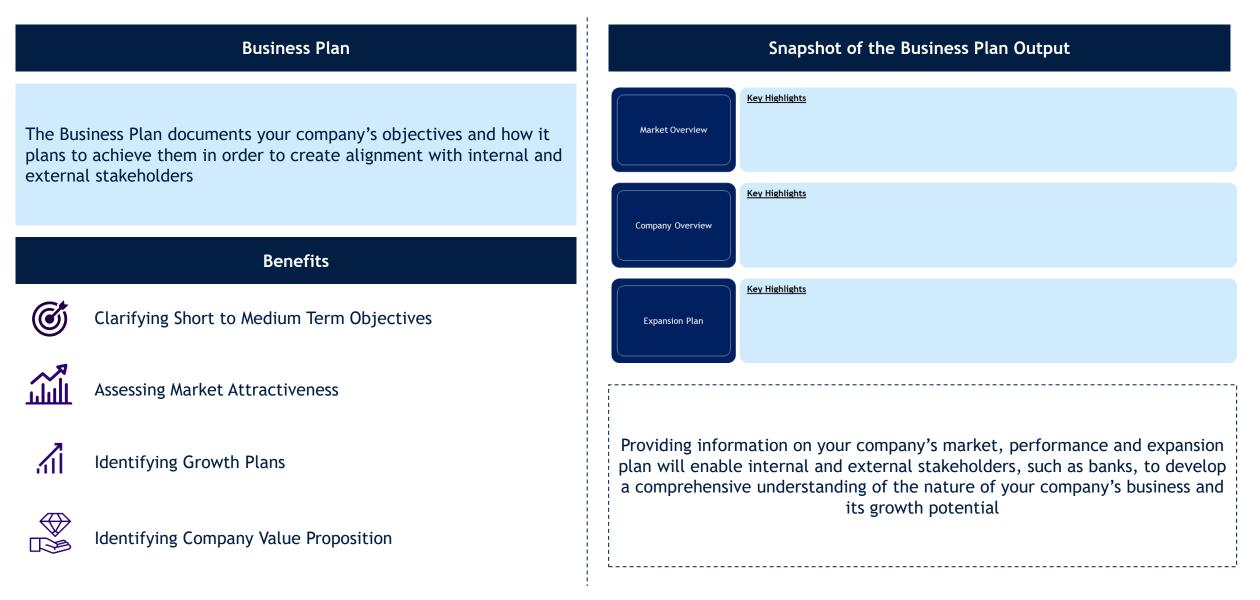

The **Financial Advisory Toolkit** is a package of practical tools and resources that can be used by HSMEs to address some of the most prominent day-to-day challenges faced in their financial management and to improve their financial performance

Toolkit Components- Business Plan

Revenue Forecasting Tool

The Revenue Forecasting Tool is an excel based tool that will help your company develop revenue targets and a financial plan for the upcoming 5 years

Benefits

Setting Clear Short to Medium Term Objectives

Controlling Costs

Providing External Stakeholders with Information on the Company's Plan

Defining the Direction for the Company's Expansion
